Admiral Stansfield Turner  
Director  
Central Intelligence Agency  
Washington, DC 20505

Dear Admiral Turner:

You are cordially invited to speak before the Fifteenth Annual Training Seminar of the National Classification Management Society which will be held May 15, 16, and 17, 1979 at the Jack Tar Hotel, San Francisco, California. Several hundred men and women who are engaged in the policy making and/or administration of classified and technical information programs in government and industry will be assembled on this occasion to discuss a wide range of topics affecting the National Security. The Seminar will afford you a unique opportunity to present your views to a highly select and knowledgeable audience. We appreciate that you carry especially heavy burdens at this time. Nevertheless we hope that you will be able to accept this invitation. Alternatively, we would be happy to hear from your personal representative.

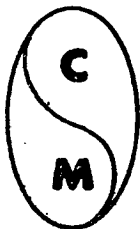

We would like to have you make a presentation on the general subject of the impact of Executive Order 12065 on the Agency and especially on its intelligence equities. The presentation would be at the luncheon on Tuesday, May 15, 1979 (about 1 p.m.).

Enclosed please find a "Speakers Information Sheet" which I would like to have the speaker complete and forward to Mr. Donovan as soon as possible. I have included some background information on the National Classification Management Society in order to better acquaint you with the aims and purposes of this organization. Because of the shortness of time, I am also inclosing additional information concerning the Seminar and special programs associated with it. You are invited to be a guest of the Society at all of the sessions, luncheons and at the reception on Tuesday evening.

Sincerely,

EDWIN A. THOMPSON  
President

FIFTEENTH ANNUAL NCMS TRAINING SEMINAR  
JACK TAR HOTEL, SAN FRANCISCO, C.  
15 thru 17 MAY 1979  
FIFTEEN YEARS OF PROGRESS THROUGH COOPERATION  
GOVERNMENT - INDUSTRY - EDUCATION

Without cooperation between those who prepare directives, those who implement them and those who must follow them, there will be confusion and differences in interpretation and application. The past fifteen years have seen giant steps taken in this cooperative effort where discussion by knowledgeable principals takes place prior to the preparation and publication of major policy and procedure documents.

To the furtherance of this cooperative effort, we dedicate our seminar.
